**Campaign Spending:** [List of Filers](#)

I am running to provide the voters of District Three a clear choice between tax and spend Democrat good old boys and Republicans who stand for ethics, lower taxes and smaller and less intrusive government.

Hawaii's taxes hit low income people the hardest and put pressure on struggling young families. This reduces opportunities for home ownership. We need to eliminate the excise tax from food, medicine and fuel and this will lower our electric bills, the price of gasoline and the cost of consumer goods. If elected I pledge never to vote to raise your taxes.

We need school choice and more charter schools to improve educational opportunities. Our young people graduate and move to the mainland. We must get regulations out of the way of local businesses and let them build an economy which is not so dependent on tourism.

We need to encourage growth at UHH so Hilo can truly be a college town and become a mid-Pacific center of environmentally-friendly high-tech enterprise.

It's outrageous that serious medical emergencies need go to Oahu for treatment with air-ambulance service in question. We must upgrade healthcare technology on the Big Island and give Hawaii's doctors a raise.

I support Governor Lingle's efforts to bring ethics, professionalism and transparency to state government. Hawaii needs a real two party system. I will never put my party above the interests of my constituents.

With your help we can make Hawaii a place where everyone gets a fair shake.

Mahalo for your support!
